(a) sliding the droplets inside the nucleus (schematic)
slide droplets
by half a period
gap-centred
droplet-centred
a_s = 90.05–90.23
a_s = 90.24–90.26
a_s = 90.27
gap
droplet
gap
droplet-centred
in the valley
gap-centred
in the valley
valley in between:
asymmetric
valley: sliding eigenvalue > 0; hump: < 0
(b) sliding mode (lowest odd)
sliding eigenvalue ($10^{-3}\hbar\omega_\perp$)
gap centred, fixed N
gap centred, fixed μ
droplet centred, fixed N
droplet centred, fixed μ
asymmetric (full space)
second rung (full space)
a_s (a_0)
(c) growth mode (lowest even)
breathing eigenvalue ($10^{-2}\hbar\omega_\perp$)
a_s (a_0)
